**Subject:** Schedule-ERA and N&E

Here is my “goal” (our goals) for the risk assessment and nature and extent investigations. It’s pretty aggressive but I think realistic. Parts of the N&E could be done under FS or even RD/RA if we even get there.

2015      Upper Animas N&E

    Cement Creek Monitoring

    UA Habitat investigation

2016      BERA sampling Upper Animas

    Finish Upper Animas N&E

    Cement Creek Monitoring (maybe)

    Mineral Creek N&E

    UA Habitat investigation (cont)

2017      Write BERA

    Finish Mineral Creek N&E and focused BERA sampling (possibly)

    Cement Creek Monitoring (maybe)

2018      Write Focused BERA for Mineral (possibly)
